Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

The Georgetown Survey District is composed of 25 major resources lying south of the Sassafras River along Augustine Herman Highway (Rt. 313) and along Front Street.. The majority of the resources are residential, with a single commercial/residential building. Of the 25 resources, 18 contribute to the potential district; 7 do not contribute. Although a period of significance has yet to be identified, the district's resources date primarily to the second half of the nineteenth century, especially those on Front Street. Several extremely significant structures were built in the eighteenth or early-nineteenth centuries, most notably Valley Cottage, ca. 1737 (K-148), Duck Hollow, 1790's (K-117), the William Henry House and the Archibald Wright House, now joined (K-146 and 147), and the Little Brick House of the 1810's (K-284). The single commercial building, the J.F.M. Woodall store (K-285) has a well preserved shop front. There are only a few resources from the first half of the twentieth century. Most of the contributing resources retain an extremely high level of integrity.
